

Legal Operations Audit

Overview

The Legal Operations Audit is a practical, high-level review of how a law firm currently operates.

It provides partners with clear, actionable insight into how work flows through the firm, how technology is used, and where inefficiencies or margin leakage exist. This is not a full transformation programme. It is a focused assessment designed to identify low-disruption improvements that can quickly improve efficiency, consistency and profitability.

Scope of Review

Practice Management Systems

Review of how the core system is used in practice and whether it supports efficient matter management.

Key Workflows and Bottlenecks

Review of how work moves through the firm, identifying delays, rework and manual steps.

Document Management and Knowledge Systems

Assessment of how documents, precedents and knowledge are stored, accessed and reused.

Collaboration Practices

Assessment of how teams work together, including Microsoft/Mac environments and file sharing.

Technology Stack and Integration

Overview of systems in use and how well they integrate, including duplication or gaps.

Use of Automation and AI Tools

Review of current use and practical opportunities to improve efficiency.

Method

Targeted Information Gathering

A short survey across partners, lawyers and staff to understand how work is performed in practice.

Key Stakeholder Discussions

Focused discussions with partners and operational leads to provide context and identify real constraints.

System and Workflow Review

High-level review of systems and workflows as they are actually used day to day.

Analysis and Synthesis

Identification of themes, inefficiencies and opportunities for improvement, prioritised by impact and ease of implementation.

Outputs

A concise, commercially focused report including:

- Operational strengths and constraints
- Key inefficiencies and bottlenecks
- Technology and integration observations
- Workflow effectiveness insights
- Practical, prioritised recommendations

Recommendations are pragmatic and focused on changes that can be implemented without significant disruption or major system replacement.

Outcome

The audit provides a clear view of how the firm operates day to day and identifies practical steps to:

- Improve efficiency across teams
- Reduce administrative burden
- Increase consistency of delivery
- Support better use of technology and AI
- Enhance profitability

Pricing (Fixed Fee)

Small firms

(upto 20 employees)

\$9,400

Medium firms

(21–50 employees)

\$10,870

Large firms

(51-100 employees)

\$12,600
